Summary

Full-Stack MERN Developer with hands-on experience building scalable web applications and AI-powered solutions using React.js, Node.js, Express.js, and MongoDB. Skilled in developing secure REST APIs, responsive user interfaces, and production-ready applications. Passionate about solving real-world problems through clean, efficient, and maintainable code. Seeking an opportunity to deepen industry expertise, contribute meaningfully to a professional development team, and grow within a structured, real-world engineering environment.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python (basic), HTML5, CSS3
Frontend: React.js, Redux, Context API, Tailwind CSS, Responsive Web Design, REST API Integration
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication
Databases: MongoDB, Mongoose ODM, MySQL (basic)
Tools & Platforms: Git, GitHub, VS Code, ThunderClient, Docker
Concepts: MVC Architecture, Socket.io, REST API Design, Component-Based UI

Experience

Vedshil

Trainee Software Developer

Gandhinagar, Gujarat

January 2026 – Present

- Built responsive web applications using the MERN stack, developing reusable React components and integrating frontend with backend REST APIs.
- Designed and integrated RESTful API endpoints using Node.js and Express.js, with JWT-based authentication and MongoDB data management.
- Participated in Git-based version control workflows and code reviews, writing clean, maintainable, and well-documented code in a team environment.

Projects

PIE – Platform for Investors & Entrepreneurs | React.js, Node.js, Express.js, MongoDB, Socket.io, JWT

- **S:** Investors and entrepreneurs lacked a structured digital platform to connect, pitch, and track funding opportunities. **T:** Designed and built a full-stack SaaS solution from scratch with secure multi-role access. **A:** Engineered role-based access control, a React component library, REST APIs, real-time Socket.io messaging, and MongoDB data models following MVC architecture. **R:** Delivered a scalable, production-ready platform that streamlines investor-founder discovery and communication end-to-end.

AI Content Generator | React.js, Node.js, Express.js, Google Gemini API, MongoDB

- **S:** Content creators struggled with slow, manual content drafting for blogs, social posts, and marketing copy. **T:** Build an AI-powered tool that generates high-quality content on demand. **A:** Integrated the Google Gemini API into a full-stack MERN application, built a prompt management system, secure REST APIs, and a responsive React interface for real-time content generation. **R:** Delivered a production-ready tool that reduces content drafting time significantly with clean, context-aware AI output.

Memory Matching Web Game | React.js, Tailwind CSS, canvas-confetti, clsx

- **S:** Needed an engaging, browser-based game to sharpen front-end logic and component-based UI skills. **T:** Design and build a fully functional memory matching game using React. **A:** Implemented card flip animations with clsx for conditional styling, Tailwind CSS for responsive layout, canvas-confetti for win celebration effects, move counter, timer, and win-state logic in React. **R:** Delivered a smooth, polished game playable across all devices, demonstrating strong React and UI fundamentals.

Education

Gujarat Technological University (GTU)

Bachelor of Engineering – Information Technology

- **CGPA:** 8.21

Gujarat, India

2022 – 2026

Achievements & Activities

- Currently gaining professional experience as a Trainee Software Developer at Vedshil (Jan 2026 – Present), working on production-grade full-stack MERN applications in a real team environment.
- Independently built 3+ projects including a real-time SaaS platform, an AI content generator, and a browser-based game — all showcasing initiative and self-driven learning beyond coursework.
- Committed to continuous growth and structured learning; seeking an apprenticeship to work alongside experienced engineers, adopt industry best practices, and contribute to meaningful products.
